

🎵 Celltown Country Cousins 🎵

Verse 1

Down the road from Cellville, come along and see,
Celltown's country cousins, a plant cell family!
Different names and faces, many jobs the same,
Cellville and Celltown are cousins in the game!
Mindy has Maggie, membranes strong and true,
Sammy has Cody, filling Celltown too.
Nora has Nelly, keeping DNA secure,
Cellville and Celltown are cousins for sure!

Chorus

Hey, Celltown! Country cousins too,
They've got lots in common with the Cellville Crew!
Different names, same jobs to do,
Working in their plant cell the whole day through!
Celltown has some special structures too,
Country cousins of the Cellville Crew!

Verse 2

Ricky and Rudy meet Roy and Ray,
Building up proteins every day.
Ernie and Earl fold proteins just right,
Ellie and Emmy make lipids day and night.
Gigi and Ginny sort and send away,
Mike and Mack make ATP each day.
Perry and Pete keep peroxide under care,
Vicky and Vera store materials there!

Chorus

Celltown! Country cousins too,
They've got lots in common with the Cellville Crew!
Different names, same jobs to do,
Working in their plant cell the whole day through!
Celltown has some special structures too,
Country cousins of the Cellville Crew!

Verse 3

Celltown has some extras you should know,
Special plant cell parts that help plants grow.
Waylon Cell Wall gives support outside,
Helping keep the cell strong on every side.
Chloe Chloroplast captures sunlight bright,
Helping make sugar using water and light.
Vera's big vacuole stores water too,
Helping keep the plant cell firm all day through!

Bridge

Plant cells, animal cells—different, that's true,
But they've got lots in common in the work they do!
Membranes, nuclei, ribosomes too,
Celltown has cousins in the Cellville Crew!

Final Chorus

Hey, Celltown! Country cousins too,
They've got lots in common with the Cellville Crew!
Different names, same jobs to do,
With some special plant cell structures too!
From Cellville to Celltown, now you know it's true—
Celltown's country cousins are family to the Crew!
