

🎵 In Sammy's Flow 🎵

Verse 1

Inside the cell membrane, filling up the space,
Sammy's gel-like cytoplasm fills the place.
Water, salts, and molecules all around,
Lots of cell reactions can be found.

Chorus

Sammy Cytoplasm, all through the cell!
A gel-like world where molecules dwell!
Sammy Cytoplasm, helping things move,
Keeping Cellville working in its groove!

Verse 2

All of the Cellville Crew are surrounded by his flow,
Working in the cytoplasm wherever they go.
Cytoskeleton fibers make tracks running through,
Moving cargo where it's needed by the Crew.

Chorus

Sammy Cytoplasm, all through the cell!
A gel-like world where molecules dwell!
Sammy Cytoplasm, helping things move,
Keeping Cellville working in its groove!

Verse 3

When your body needs water and starts running low,
By osmosis, out of the cells water can go.
Cellville gets crowded as the cell starts to shrink,
That's why your body needs water to drink!

Chorus

Sammy Cytoplasm, all through the cell!
A gel-like world where molecules dwell!
Sammy Cytoplasm, helping things move,
Keeping Cellville working in its groove!

Verse 4

Drink water each day and throughout your play,
Help keep Sammy hydrated along the way.
Water helps your cells keep doing their part,
So give Sammy a drink and a healthy start!

Final Chorus

Sammy Cytoplasm, all through the cell!
A gel-like world where molecules dwell!
Sammy Cytoplasm, helping things move,
Keeping Cellville working in its groove!
